Section 3: Consent to take part in Water Safety activities:		
I give consent for my child named above to participate in Water Safety activities which will be supervised by School		
Staff. I understand that the water safety instructor will be in charge of the water activities.		
I understand that failure to provide a Health Care Plan will mean standard first aid management can only be applied.		

Signature:

Standard Health Care Support for the most common health conditions:

Asthma Any child currently prescribed asthma medication must bring their medication. Asthma

Care Plan should be attached to this consent form.

Standard First Aid:

Four puffs of reliever medication. Wait four minutes. If no relief, four more puffs, wait four

minutes. If still no relief, call an ambulance.

No return to the water after two lots of reliever medication within any given session.

Seizures Any student with a diagnosed history of seizures, must have an adult acting as one to one

> safety watch, provided by the school. Seizures are generally managed in the pool. Continuation in the Water Safety program that day will be assessed by a supervising

teacher in consultation with the student's health care plan.

Diabetes First aid as per individual Diabetes Care Plan.

Severe As per Allergy Specialist Care Plan.

Ear wrap or fitted plugs to be worn throughout water activities, unless written medical advice is provided saying this is not necessary.

As per Care Plan. Any accidents that result in contaminated water must be managed

as per health regulations.

Cryptosporidium Infection

Cryptosporidiosis is caused by the parasite Cryptosporidium. It is highly infectious and can be transmitted by swallowing water contaminated by the parasite in public swimming pools. The main symptoms associated with this illness include watery diarhoea with stomach cramps. If your child has been diagnosed with Cryptosporidiosis or has had these symptoms recently, they should not use public swimming pools for 14 days after the symptoms have stopped.

As per Care Plan.

All open wounds must be covered, for the child's own protection, with a waterproof occlusive bandage.

- Students with significant unhealed wound(s) will be advised not to enter the water until the wound has closed.
- Students with ringworm should not commence water activities until at least 24 hours after commencement of appropriate treatment (usually a topical anti-fungal cream)
- Students with tinea should not go into pools or change rooms until at least 24 hours after commencing appropriate treatment.
- Wearing slip-on footwear while walking in the pool and change rooms protects against transmission of some infections such as tinea and plantar warts.

NB Failure to provide adequate information about your child's health condition will mean that in the event of a medical emergency your child will be treated with standard first aid management.
